Recognition and the EU

Proposal for a Council Recommendation published on 22 May 2018 :

- A qualification in one Member State is automatically recognised, for the purpose of granting access to higher education, in the others.
- The outcomes from a learning period abroad are automatically and fully recognised.

Education and training institutions will remain free to make independent decisions on admission to their programmes.

Effective policy implementation

Smart policy design

- The justification, validity of its causal theory and goals, complementarity with other policies and feasibility should be well defined before implemented.

Inclusive stakeholder engagement

- Actors can interpret, react and influence implementation. Including them throughout the process facilitates success.
- Prevent reactions against reforms.

Conducive context

- The process' features are adapted to the structures of its system at a given time, to the particular actors, and around the specific educational policy.

Coherent implementation strategy

- A coherent plan outlines concrete measures to make the policy design operational, with sufficient resources, capacity building, communications, and engaging stakeholders.
